RECLAIMING LEGACY

Finish the Work.

From contribution to ownership.

Communities that create value should own productive assets, steward them and pass that wealth to future generations.

50% COMMUNITY TRUST
50% INVESTORS

PROPOSED OWNERSHIP TARGET AT EACH SOLAR PROJECT

Land. Clean energy. Generational wealth.

The atlas helps identify infrastructure and land leads. The development pathway brings together site control, interconnection, offtake, financing and community governance for proposed 5 MW solar projects.

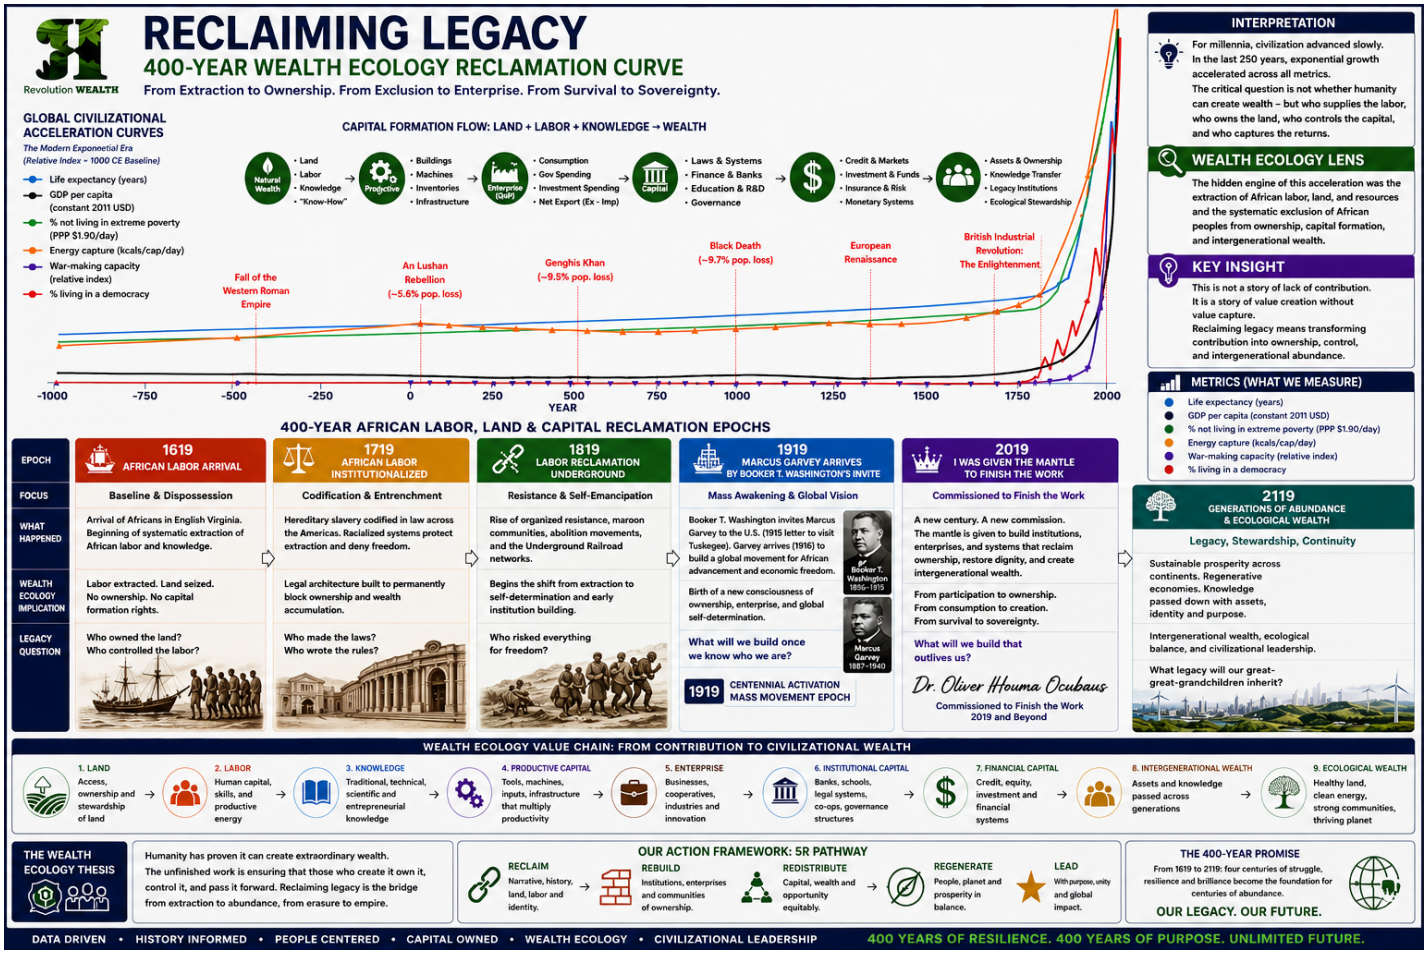
Reclaim. Rebuild. Redistribute. Regenerate. Lead.

Read our story and explore the atlas at WeAreRevolutionWealth.com.

Public mission and project-development materials. The 5 MW size and 50/50 project ownership are proposed targets. No completed acquisition, executed PPA, established community trust, confirmed interconnection capacity, investment return or tax benefit is represented. This is not an investment offer. The original graphic is a founder-supplied vision; its curves are illustrative. 2019 is a personal account and 2219 is a future aspiration.

The why behind the work.

The original Reclaiming Legacy vision connects historical contribution, the founder's 2019 personal commission and an aspiration for abundance in 2219.



1619 - 1719 - 1819 - 1919 - 2019 - 2219

These are chapters in a reclamation framework. The full-size graphic and readable narrative are available on the Our History page. The original curves are illustrative; the future chapter expresses a vision.

Launch announcement

Revolution Wealth shares Reclaiming Legacy: Finish the Work, the founding story behind its community ownership mission. The story connects a 400-year reclamation framework with the founder's 2019 personal commission and a long-term vision of intergenerational and ecological wealth. The proposed solar model targets 5 MW projects with 50% community trust ownership and 50% investor ownership at each project. Subject: Reclaiming Legacy: the story behind Revolution Wealth

Hello,

We have published Reclaiming Legacy: Finish the Work, the founding story behind Revolution Wealth.

Our purpose is simple: communities that create value should own productive assets, steward them and pass that wealth to future generations. The story connects the legacy of contribution with our founder's 2019 commission and the institutions we aim to build.

Our proposed solar project model targets 50% community trust ownership and 50% investor ownership. We are developing the pathway through land research, interconnection, offtake and project governance.
